

## 4-column elevator for alignment

**REF: TK 44 C**

Capacity: 4 ton

Elevation height: 25cm + 190cm

Hydraulic pressure: 2.320psi

Engine: 2.2kw

Voltage: 380/220

Long platforms: 4.56m

**4 ton**

Elevator characteristics:

-Columns made of 5mm steel  
steel platforms of 8mm, all parts of the tk elevators are cut with laser technology, with a minimum tolerance between their moving parts, the lifting capacity is higher.

-Appropriate especially for tire alignment procedures, tire disassembly and chassis revision

-Manual brake and double safety protection to guarantee the safety of the operator and the equipment.

-The anti-friction part on the axis of rotation manufactured with laser cutting ensures a smooth and very durable operation of the equipment.

-Includes side plates for extended rear wheels and adjustable position for alignment discs, which makes it compatible with large, medium and small equipment.

platforms	space between poles	Minimum height
4564 mm	2715 mm	250 mm
